CORE CAPABILITIES

Our administrative team and traffic control technicians are business professionals; we specialize in temporary traffic control solutions, training and development and providing customer satisfaction:

- ▶ Flagging
- ▶ Job Training
- ▶ Temporary & Long term help services
- ▶ Construction Management
- ▶ Traffic Control Devices

Flagging: control vehicle traffic; to create a safe environment for construction and repair projects in work zones using temporary traffic control safety devices, i.e. flaggers, signs and devices.

Job Training: We offer 5 hours work zone education, OSHA 10 hour construction industry (online training) and 80 hours' field training to include driver safety truck w/trailer training (license required).

Temporary & Long term help services: As a GDOT subcontractor and Local Small Business Enterprise (LSBE) we assign certified flaggers, uniformed police officers and/or authorized workers to various construction, paving and utility projects.

Construction Management: We install and maintain traffic control and safety devices (including cones, barrier, warning devices, temporary striping) during construction; and detours.

Traffic Control Devices: We furnish and install all equipment and materials used in the construction of traffic signal installations. Including furnishing and installing reflectorized delineators, installing reflectorized pavement markers and removing pavement markers.
